

UIRR at largest logistics trade show in Europe

UIRR, the industry association of European Combined Transport Operators and Terminal Managers, will be present on the joint stand with IBS, the international rail freight business association.

Over the duration of Transport Logistic in Munich, the **UIRR team will be available to explain and discuss the present European initiatives affecting the intermodal sector**, including

- the upcoming revision of Directive 92/106;
 - the status of the Commission Implementing Act on Access to Service Facilities;
 - the anticipated new EU road regulatory developments;
 - the Commission's digitalisation initiative;
 - the ongoing European standardisation work;
 - the implementation of the Weights and Dimensions Directive (719/2015);
 - the Fourth Railway Package;
 - the revision of COTIF and the developments of international railway law;
- as well as many other topics, relevant to sector players.

Don't forget to ask for a copy of the 2016-17 UIRR Report when you visit our stand!

UIRR pursues a mission to **grow the pie for intermodal transport through fair competition based on equal regulatory terms, technical merit and management excellence**. The three-pronged approach of the association to achieve this goal is PROMOTE – ENHANCE – SUPPORT, where

- *promote* stands for the systematic collection of industry statistics and the dissemination of information on Combined Transport to better inform policymakers and the public;
- *enhance* aims to develop new solutions, technical standards and industry best practice to further enhance the competitiveness of Combined Transport; and
- *support* stands for services extended by UIRR to assist with the daily operations of Combined Transport.

Ralf-Charley Schultze

"The UIRR team will be seeking to meet all interested representatives of the intermodal sector in Munich during the week and to discuss the ongoing European activities. It's important to understand the way Europe works, intermodal transport being mainly international. Every business has a need to understand how the regulatory framework is shaped towards harmonisation throughout the continent." - commented UIRR President Ralf-Charley Schultze.

Who is UIRR?

Founded in 1970, the **International Union for Road-Rail Combined Transport (UIRR)** represents the interests of European road-rail Combined Transport Operators and Transshipment Terminal Managers.

Road-Rail Combined Transport (CT) is a system of freight forwarding which is based on efficiently and economically inserting electric rail into long-distance (road) transport-chains through the use of intermodal loading units (ILU).
